

Make authentic assessment scoring faster and more accurate than ever

OSCAR is the authentic assessment platform for quality scoring
and instant reporting from anywhere on almost any device.

This 100% paperless solution gives you everything you need for an accurate score every time.

Score from anywhere on almost any device

Designed for distributed scoring, OSCAR gives organizations the flexibility to build a team regardless of location. Dynamic real-time dashboards and reporting allows for constant quality monitoring throughout a scoring project.

Save money, time and energy

Remove all paper, travel, and other inefficiencies from your scoring projects. OSCAR has proven to drastically reduce cost while delivering the best in class scoring technology.

Fast, accurate and reliable scoring

A powerful software engine reduces load times and instantly collects data for review. OSCAR integrates with AI-scoring engines to allow super-fast scoring of even complex item types.

Score

Safe scoring no matter the media type

Review

Track your KPIs instantly

Manage

Collaborate and ensure quality standards

Integrate with any assessment delivery platform

OSCAR is platform agnostic, regardless of your delivery platform. With OSCAR's suite of APIs, it is easy to integrate with assessment delivery and reporting platforms.

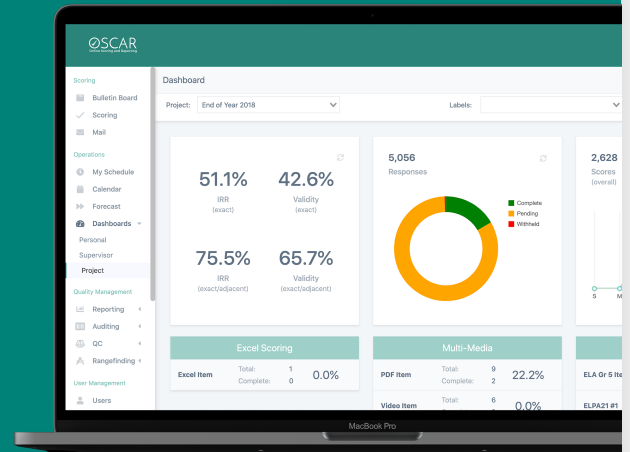

Designed for everyone

OSCAR was built with non-technical users in mind. Multi-layer access management options and powerful customization functions fit neatly within a simple user interface. It will even integrate with your existing assessment authoring or management tools.

Book a demo at your convenience

Our team is ready to give you a sneak peek into OSCAR's capabilities whenever you like. We'll show you just how fast you can score a stack of papers and how it can change the face of your organization.
