ProProctor™

PROMETRIC

Now is the time to shift direction, not stand in place.

COVID-19 has changed everything — except how great leaders and companies react to adversity and change business practices accordingly. Today, that means discovering innovative ways to maintain productivity and momentum, while keeping employees and candidates safe.

Can your candidates continue to test safely, reliably and securely?

They can with ProProctor™, our proven remote assessment platform. It is the ultimate solution for today's environment, letting you continue testing candidates, online, 24/7, without interruption. And, because ProProctor is based on the same delivery technology that helped make us the trusted world-leader in on-site assessment — with more than 7 million exams annually — it gives your candidates the same high-quality, easy-to-use testing experience, no matter where they are located.

As we emerge from COVID-19, and more of our 14,000+ test centers reopen, ProProctor can continue to be a **valuable solution** — complementing your in-center testing program while providing the same level of **security and reliability**.

Safety for today. Flexibility for tomorrow. Security and reliability forever.

Live. Monitored. Secure. Simple.

ProProctor is not just an online test, or simply an access portal. It is an entire suite of proprietary technologies providing a locked-down testing environment monitored live, in real-time, by Prometric's trained and certified professionals. It supports secure, computer-based testing on any modality — and is expanding the way testing is done as businesses evolve and candidates' needs change.

ProProctor Advantages

Ensure Business Continuity
- Provides 24/7 access for candidates
- Improves geographic reach to remote locations
- Enhances in-center testing by giving candidates an online option

Enhance The Candidate Experience
- Provides a consistent testing platform for on-site and online candidates
- Live readiness agent support chat capability for candidate questions
- Simple system validation with minimal setup and low bandwidth requirements
- Candidate friendly tools like pre-exam videos, self-guided setup, and digital scratchpad

Secure Your Assets
- Multi-level agent monitoring
- Candidate authenticity verification and 360º environmental checks
- Proprietary locked-down browser
- Live security agent combined with AI anomaly detection to alert for environmental risks
- Real-time and recorded video functionality

Scale Effortlessly
- Open cloud native architecture supported by leading technology solutions to increase stability, security, and performance at scale

A Better Service Solution

| Remote Proctoring	Prometric	0ther Providers
Ease of use/installation process	Simple and intuitive. Prometric only software.	Moderate to difficult. May require 3rd party software.
Fully integrated environment	One environment across all modalities. Same exam driver. No publishing requirements. Complete program control.	Multiple environments and/or integration complexities.
100% live proctoring	Continuous monitoring by multiple certified proctors.	Varies, most have limited test delivery experience.
Advanced security	Computer and browser lockdown. Proctors are never able to view exam content.	Browser lockdown. Examination content is exposed to proctors.
Proprietary browser	Prometric developed. Exam content will never be impaired. No reliance on commercial browsers for exam delivery.	Resilience on commercial browsers. User must disable browser settings. Inconsistent presentation of content.
Technology monitoring	AI-assisted proctoring coupled with continuous biometric facial and audio detection and alerts.	Limited capabilities.

What our customers are saying

" Even without a Test Center Administrator physically in the room, we were able to deliver exams in a secure environment through ProProctor."

-Educational Testing Services

" By using ProProctor, we can now deliver exams securely and conveniently to some of our most remote candidates."

-Human Resource Professionals Association
