# What does Flexibility Mean to your Testing Organization?

High stakes delivery requires flexible software solutions. ExamStudio includes Itembanking, publishing, and delivery solutions that customize to your organization's needs. Review below a few ways to make this flexibility work for you.

**Portable**

Test center delivery requires that Forms and Items can pass between systems without the need for intervention by your exam developers. Whether QTI or XML, items only or full exams, Zoomorphix can streamline this process. Further, the same exam can be transported in different formats for multiple test center vendors with consistent results.

**Versatile**

ExamStudio web delivery allows you to think outside the test center with event-based delivery, test center delivery, remote proctored, practice exams, self-assessments, and demonstration exam delivery.

**Control**

Internet-based testing with test center delivery partners allows exam developers full control of the publishing process, making changes and updates at any time.

**Consistent**

Regardless of the delivery method, candidates experience the same appearance, performance, and quality.

**Variety**

Choose the item types that work for best for your disciplines. Case-based scenarios, advanced item types, and customized simulations are all available.

**Multilingual**

Full multi-language support for development, publishing, and delivery.

**Scalable**

Offer online practice exams with ExamStudio web delivery. Practice, certification, and sample modes available.
